# Quick and easy to
Software Update.

So your RATIONAL cooking systems are always up-to-date.

Automatic software updates with ConnectedCooking.

Example SelfCookingCenter and VarioCookingCenter

Example iCombi Pro and iVario

Go to ConnectedCooking in the settings and set the automatic software update to ON.

Step 1: Activate automatic software update on the unit. As soon as your RATIONAL unit is connected to ConnectedCooking and activated under **Unit settings/ConnectedCooking/Automatic software updates**, you will automatically receive new updates on your unit. It can take up to approx. 24 hours until the first update appears on your display. Of course, you can use your RATIONAL unit as usual during this time.

➜ **So simple:** automatic software updates with ConnectedCooking.

Example SelfCookingCenter and VarioCookingCenter

Example iCombi Pro and iVario

Confirm software update.

Step 2: Confirm automatic software update on the unit. New updates will automatically appear on the unit displays. All you have to do is confirm the update on the unit with just one tap, then it is carried out and the unit is restarted. The process is completed in a few minutes.
